Attn: Steve Sequeira

Hello Steve,

I just wanted to send you this note to show my gratitude to you and your company for the superb service you provided to us on the fabrication and installation of our Rotobale compactors.

In particular, thanks for helping us out in fabricating an offset design to adjust for the walk-in door openings on the building that were pieced too close to the receiving doors. Your design works great and looks great.

You also had a broken switch (in transit) replaced and verified within 2 days. I could not ask for better service.

I really appreciated your help throughout this process.

Sincerely,

A handwritten signature in black ink that reads "Austin Curtin".
